

UbiTimer EDU Case Study

How One School Improved Lesson Transitions Using UbiTimer

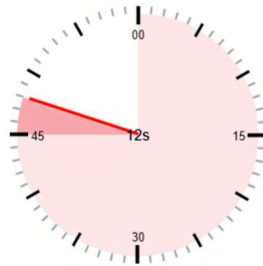

Background

A UK secondary school trialled UbiTimer for four weeks to improve lesson pacing, reduce interruptions, and make transitions predictable for students.

Implementation

Teachers used UbiTimer during starters, group work, silent tasks and assemblies. They projected the radial timer for competitive and timed activities.

Team Quiz 

Radial countdown timer projected during a team quiz.

Key Results

- Transitions completed around **30% faster**.
- Fewer 'How long is left?' interruptions.
- Activities stayed within agreed timings.

Teacher Feedback

- “Students became more focused when the countdown was visible.”
- “Behaviour improved because transitions became predictable.”

Why UbiTimer Works

- Visual timers reduce anxiety and improve behaviour.
- Supports SEN students with predictable routines.

- Works on Windows, Mac and Teams.
